

Performer ALFALFA

- Tremendous milk and weight gain per tonne of feed with extremely low lignin content which is hard to beat.
- Extremely fine stemmed with a very high leaf to stem ratio making Performer very popular in the export and horse hay markets
- Performer exceptional RFV and TDN numbers can be used in any hay program

AGRONOMIC TRAITS

Maturity:	Early
Fall Dormancy:	4.4
Winter Hardiness:	1.88
Cutting Per Year:	3 - 4
Forage Yield:	Very Good
Digestibility/Feed Value:	Superior
Grazing:	Average
Well Drained Soils:	10/10
Modestly Wet Soils:	8/10
Disease Resistance Index:	30/30
Recovery After Harvest:	Excellent
Traffic Tolerance:	Excellent

High Leaf-to-Stem Ratio
