

Perfection ALFALFA

- The very newest generation of fast growth standfast alfalfa varieties with extremely improved stand-ability and feed digestibility
- Unbeatable milk and weight gain per acre of feed versus similar varieties on the market today
- Perfection is developed for a aggressive 3 to 5 cut haylage of baleage operations

AGRONOMIC TRAITS	
Maturity:	Very Early
Fall Dormancy:	4.0
Winter Hardiness:	1.93
Cutting Per Year:	3 - 5
Forage Yield:	Superior
Digestibility/Feed Value:	Excellent
Grazing:	Very Good
Well Drained Soils:	10/10
Modestly Wet Soils:	7/10
Disease Resistance Index:	28/30
Recovery After Harvest:	Superior
Traffic Tolerance:	Superior
