

Cornerstone ALFALFA

- A unique alfalfa that has yield, disease resistance, fine stemmed, dark green, and highly palatable
- Extremely drought tolerant with rapid recovery after cuttings
- Cornerstone can be used in a 3 to 4 cut haylage, baleage, or dry hay rotation

AGRONOMIC TRAITS	
Maturity:	Early
Fall Dormancy:	4.4
Winter Hardiness:	1.63
Cutting Per Year:	3 - 4
Forage Yield:	Excellent
Digestibility/Feed Value:	Excellent
Grazing:	Very Good
Well Drained Soils:	10/10
Modestly Wet Soils:	8/10
Disease Resistance Index:	30/30
Recovery After Harvest:	Superior
Traffic Tolerance:	Excellent
